

Running A Hotel?

Join our programme today and receive
a fleet of e-Bikes at no cost to you.

Electrify Your Guests With Your Own, On Site, Self- Service, E-Bike Fleet

We supply you with a fully managed
fleet of e-Bikes. You don't have to pay
for them, or our turnkey service. It's
all funded through a revenue sharing
agreement and we typically renew the
E-Bikes every two years.

Reservations, rentals, customer service
and payments are handled via our QR
code rental App, freeing up your staff
and creating a seamless customer
experience.

Our e-Bike Programme Can Help Drive Better Corporate ESG & CSR Policies

“

We can help drive better ESG policies that positively impact your corporate social responsibilities.

It's widely accepted that e-Bikes improve physical health and well being.

Our scheme encourages you employees and guests to embrace this and their social and environmental responsibility.

We encourage, and enable, you to deploy our turnkey solution through our low financial barrier to entry and no-risk, no-cost approach.

”

Positive CSR and ESG benefits to your business include:

financially & environmentally sustainable eco service

being eco-conscious enhances business reputation

a green initiative that improves social responsibility, staff and employee health and welfare

encouraging your employees and guests to reduce their carbon footprint

positive effects on social and corporate governance

off-set your carbon emissions

driving new business income streams that are sensitive to the environment whilst good for your bottom line

Positive commercial and guest benefits include:

meeting guest expectations who, research shows, prefer eco-friendly destinations and activities

increase guest satisfaction through improved mobility

ease of booking in advance, or on site, without any reliance on, or training of, your staff

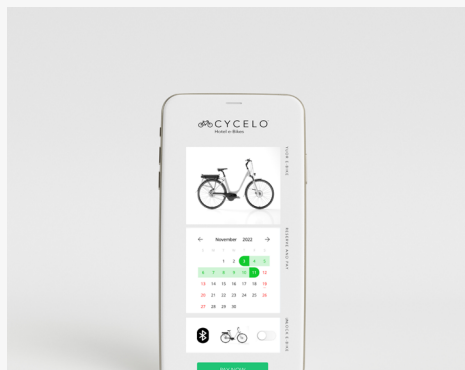

a true turnkey service that manages the guest, the service, and the total service delivery end to end

no compliance, legal or insurance concerns - guests hire through us, on our insurance, all at our risk

create your own e-Bike fleet, on a eco and balance sheet friendly basis, at no risk or cost to you

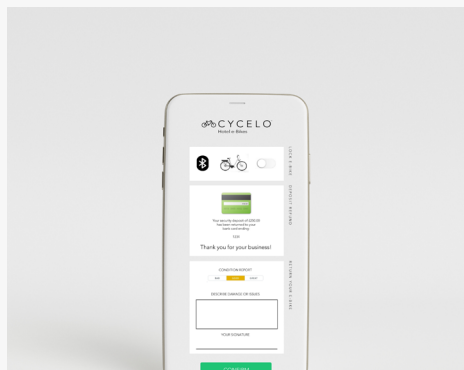

How It Works

Available to hoteliers and their guests in the British Isles, EU, USA, Caribbean, Canada, Australia and New Zealand today!

Scan QR Code To Hire

Guests scan the e-Bike QR code allowing them to reserve and commence hire. Our App unlocks the e-Bikes automatically.

Manage & Off Hire Online

All guests services, payments, refunds, queries, support and damage reports are handled by our team via our App.

Meet your guests needs with the latest e-Bike technology

Because we supply, manage and service your e-Bikes you avoid all operating and support costs.

All you have to do is supply power and guests!

How It Works At Your Venue

Our solution is simple, unobtrusive and effective because it puts your guests in control, quietly generating incremental revenue with no operational risk or overhead.

Lobby signage

Elegantly, and effectively, inform your guests, driving incremental revenue to your hire station.

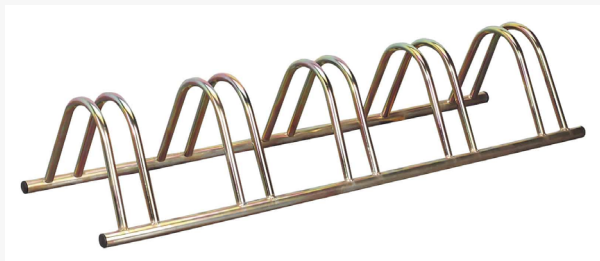

Scanning QR code automates the entire hire process through our App.

Wall or ground mounted e-Bike stations supplied where practical

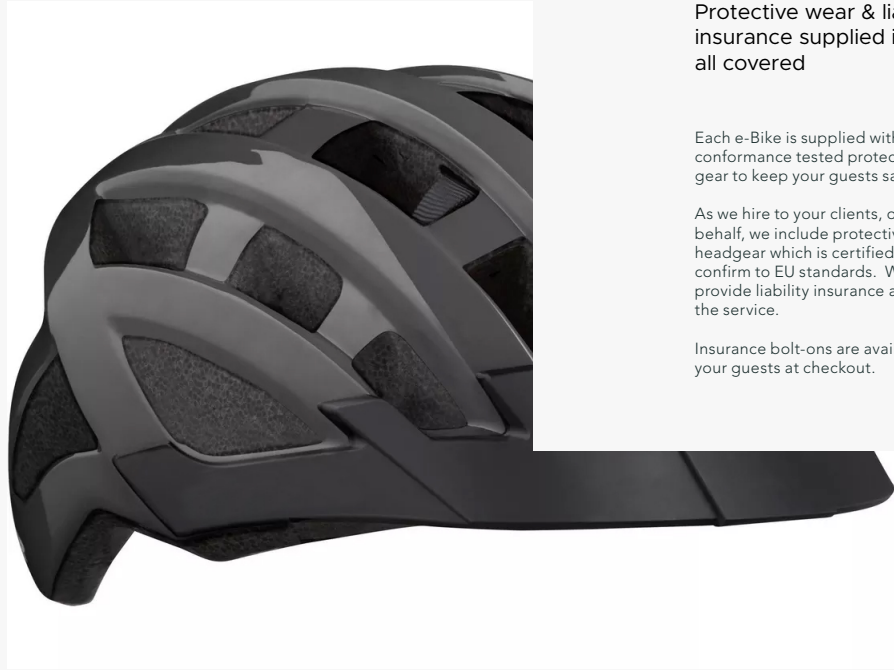

Guests proceed to your hire station, digitally unlock their e-Bike and go!

Alternatively, they collect from concierge, or you deliver to their accommodation to suit using the App management function to select and unlock the correct e-Bike.

Either way its a breeze.

Safety & Security

Protective wear & liability insurance supplied is all covered

Each e-Bike is supplied with EU conformance tested protective gear to keep your guests safe.

As we hire to your clients, on your behalf, we include protective headgear which is certified to confirm to EU standards. We also provide liability insurance as part of the service.

Insurance bolt-ons are available to your guests at checkout.

Our e-Bikes are secured electronically via e-Locks paired to our App and backend platform

Each e-Bike is paired to a digital lock in our back-end platform that we designed and built in-house to make our service completely unique and highly secure.

This allows the e-Bike to be locked and unlocked by your guests, and staff, via our App.

Once on hire, we can track usage, locking and mitigate theft risks.

Our locks secure the e-Bike and helmet like a conventional cable lock and have built in tamper protection for peace of mind and convenience.
